

TEXAS DATA REPOSITORY

Deposit your data in the **Texas Data Repository**, a cloud-based platform for publishing and sharing data created by faculty, staff, and students at Texas higher education institutions.

Comply with funding requirements. Comply with funder mandates for data archiving and sharing while using a resource for developing data management plans and grant applications.

Ensure reliable, managed access for your data. Collect and share your data in a convenient and reliable place, and benefit from long-term access and preservation of your content.

Increase your scholarly impact. Your work will also be indexed in search engines, and track the number of times users access it.

Collaborate with research teams. Share your data with a select group of colleagues, version it, and publish it when you're ready.

Access local support through your institution's academic library. Rely on trained library liaisons at your home institution to assist with each phase of the research cycle, including data management planning, preparation for data publishing, and long-term data curation.

The repository is hosted by the Texas Digital Library. To learn more about how to get started using the Texas Data Repository at your school, visit tdl.org or email info@tdl.org.

ACCESS. DISCOVERY. IMPACT.
